

Laptop Depot™ Specifications

Introduction

The Laptop Depot™ (LTD) provides a secure and easy way to charge, store, and/or transport laptops in a school, government, training, or corporate environment. Each unit is secured with a key lock to help ensure the security of its contents. Some units are equipped with casters to provide mobility and convenience. Laptop Depots™ can be installed under desks to preserve floor space or they also fit under most desks when on casters.

Construction

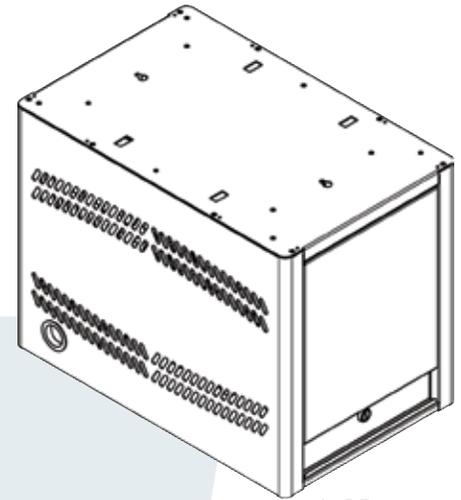

Dividers

The Laptop Depot™ (LTD) incorporates a unique Power Management Divider (PMD) which:

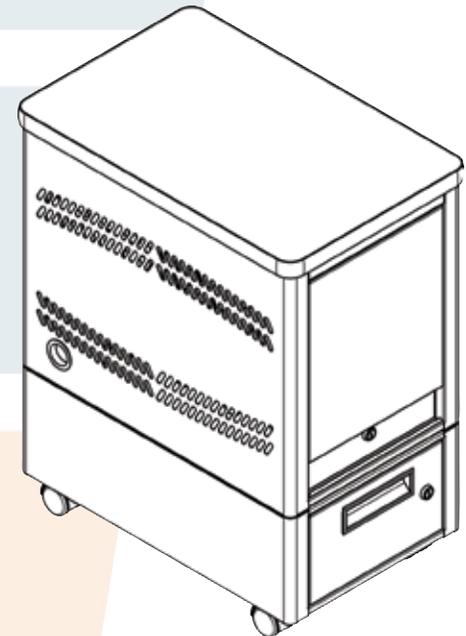

- Is constructed of a single piece of 20-gauge steel, spaced 1-7/8" apart and is removable to facilitate the storage of other devices when computer slots are not being used. Maximum brick thickness able to be stored between dividers is 1-7/8" wide.
- Incorporates a design conducive to airflow and assists with the dispersing of heat from the power supply and the laptops.
- Provides a cord management solution by wrapping the laptop power supply cord around the divider to keep the cord neat and organized. This is done by removing the PMD, wrapping the cord, and then securing the power supply and cord to the PMD with a plastic wire tie. The laptop cord is threaded through the top holes of the PMD so as to hang in the appropriate location. The PMD is then inserted back into the LTD and the electrical plug is plugged into the power strip located inside the rear of the unit.

LTD Body and Storage Compartment

- Laptop compartment size can accommodate up to 17" screen laptops.
- Venting designs on both sides and the rear of the unit allow for natural convective airflow to aid in cooling when door is closed and lateral airflow when door is open.
- The sides, rear and door are constructed of 18 and 20 gauge steel.
- The locking mechanisms are a three point lock on the front door and a single point key lock on the rear panel.
- Locking doors and UL/CSA approved electrical components are standard on all models of the LTD.
- Each unit features a 1-1/4" cable grommet on both sides of the unit for easy cable management.
- Available in all standard colors.
- 100% of all painted steel components are powder coated finish. Powder coating is the most environmentally safe coating method available today.

Dimensions

Exterior Dimensions:

LTD5 - 14"W x 22"D x 17"H LTD8 - 20"W x 22"D x 17"H LTD10 - 24"W x 22"D x 17"H

LTDP5-2 - 14-3/4"W x 22-3/4"D x 28-1/16"H
LTDP8-2 - 20-3/4"W x 22-3/4"D x 28-1/16"H
LTDP5-3 - 14-3/4"W x 22-3/4"D x 29-11/16"H
LTDP8-3 - 20-3/4"W x 22-3/4"D x 29-11/16"H
LTDP10-3 - 24-3/4"W x 22-3/4"D x 29-11/16"H
LTDP5-5 - 14-3/4"W x 22-3/4"D x 31-3/4"H
LTDP8-5 - 20-3/4"W x 22-3/4"D x 31-3/4"H
LTDP10-5 - 24-3/4"W x 22-3/4"D x 31-3/4"H

Individual compartment space: 1-7/8"W x 17-1/2"D x 12-9/16"H

Laminate Top

- Durable 1-1/8" laminate wood top with t-molding and rounded corners allow for use of printers, projectors, and other equipment on top of the LTD.
- Provides a smooth working and writable surface, unobstructed by handles or a metal lip.

Pedestal Base (Pedestal and cart models only)

- A locking pedestal base is used for additional, secure storage at the bottom of a LTD.
- 3 wheel styles available
 - Pedestal style - 2" nylon wheels
 - Cart style - 3" or 5" casters
- Interior drawer base dimensions:
 - 5 capacity - 9-1/4"W x 16-3/16"D x 5-1/2"H
 - 8 capacity - 15-1/4"W x 16-3/16"D x 5-1/2"H
 - 10 capacity - 19-1/4"W x 16-3/16"D x 5-1/2"H

Security

- 3 point key lock on front door and single point lock on rear access panel.

Electrical Components

UL/CSA Power Strip

- Each LTD is equipped with a 5, 8, or 10 outlet UL/CSA power strip (depending on the model chosen).

Power Strip Cord Lengths

5 outlet - 6' cord

8 outlet - 8' cord

10 outlet - 8' cord
