

# NetBook Carrier

The NetBook Carrier™ stores, charges, and transports netbooks and classmate PCs. It is designed as a secure storage and charging solution for classroom and training environments where shared computers are used.

CSC-ML30 shown

- Tambour door recesses into the cart to provide unobstructed access to the stored computers and then closes and locks with a reinforced lock hasp to protect the contents of the cart, all while saving valuable floor space.
- Durable laminate top provides a smooth work surface with optional Pop Up Power Center for powering devices used on top of the cart.
- The patented Power Management Dividers ensure power cords are neatly stored and are removable to make cord management simple.
- The UL listed timer power center features an on/off switch, circuit breaker protection, and 96 cycle/15 minute setting intervals to alternate power between shelves of netbooks to prevent circuit overload.
